## LEADING CPG COMPANY: PRODUCTION SCHEDULING OPTIMIZATION

### Scheduling Optimization

Our solution replaces reactive planning with optimized time-based production cycles. This improves predictability and reduces inventory, while maintaining flexibility to react to disruptions.

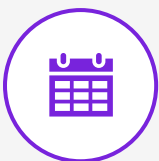

### Rhythm Wheel

The Rythm Wheel stabilizes production cycles and optimizes changeovers. This lowers changeover times, improves throughput and cuts operating costs.

### Production Capacity

Reduction on changeover hours free up 17% production capacity per week enabling 500 additional hours of production per year.

## SPECIAL OFFER: SCHEDULING REVIEW

Contact us and  
schedule a meeting.

Talk to one of our experts.

Identify savings  
potential in your scheduling.
